

Interpreting Velocity-Time Graphs

The motion of a two-stage rocket is portrayed by the following velocity-time graph.

Several students analyze the graph and make the following statements. Indicate whether the statements are correct or incorrect. Justify your answers by referring to specific features about the graph.

- | Student Statement | Correct?
Yes or No |
|--|-------------------------------|
| 1. After 4 seconds, the rocket is moving in the negative direction (i.e., down).
Justification: _____
_____ | _____
_____ |
| 2. The rocket is traveling with a greater speed during the time interval from 0 to 1 second than the time interval from 1 to 4 seconds.
Justification: _____
_____ | _____
_____ |
| 3. The rocket changes its direction after the fourth second.
Justification: _____
_____ | _____
_____ |
| 4. During the time interval from 4 to 9 seconds, the rocket is moving in the positive direction (up) and slowing down.
Justification: _____
_____ | _____
_____ |
| 5. At nine seconds, the rocket has returned to its initial starting position.
Justification: _____
_____ | _____
_____ |
